BUILDINGS AND MONUMENTS,

MODERN AND MEDIÆVAL;

Being Illustrations of the Edifices of the Nineteenth Century, and of some of the Architectural Works of the Middle Ages.

By GEO. GODWIN, F.R.S.,

Fellow of the Institute of Architects; Corresponding Member of several Societies.

OPINIONS OF THE PRESS.

"The bold and effective woodcuts which have now appeared for some years past in the weekly sheets of our excellent contemporary *The Builder*, must be familiar to all who are the least interested in architecture if it were only from the show they make among their fellows of the 'Illustrated' press in the windows of the news-venders. It will, we are sure, be very acceptable to such as set a higher value upon these prints than the ephemeral pleasure they give on their first appearance, to have smooth and well-printed impressions at a very moderate price. In the republication now before us with the advantages of glossy ink and tinted paper, they assume a beauty which many persons will be scarcely prepared to expect, who are not fully aware of the great importance of good printing to wood engravings."—*Gentleman's Magazine.*

"This cheap and handsome re-issue of the principal cuts which have appeared from time to time in *The Builder* is an exceedingly useful addition to illustrated literature. We know that work is read and purchased by many who have no connection with building; there are, however, a class who are not aware of the value or curiosity of its many engravings, and such persons will, no doubt, avail themselves of this handsome re-issue of them, printed on finer paper, and with greater care, and accompanied with a proper amount of descriptive letter-press."—*Art Journal.*

"A publication of much merit and interest. The articles are able and sensible, the engravings excellent."—*The Literary Gazette.*

"The idea of republishing in a separate and handsome form some of the best architectural subjects that have been given in the Builder, is a good one. Besides being thus brought together within a comparatively small and convenient compass, separated from miscellaneous matter of only technical or temporary interest,—the woodcuts are so greatly improved in appearance that they certainly seem to be from the same blocks as the originals. The same illustrations, or the same number of them, could not have been brought out at the same price had not the blocks been already executed, and had they not served their purposes in a periodical having an assured sale."—*The Athenæum.*

"Unparalleled in the artistic world for cheapness as well as for utility and beauty of effect." "It is among the cheapest and the best works of the kind ever published."—*The Observer.*

"This ought to be supported by public patronage, for it certainly affords, as a very moderate price, a greater quantity and variety of entertainment to the eye as well as to the mind than has hitherto been afforded by any popular architectural publication. It appears to us a publication of value, illustrating new buildings, together with others of older date."—*The Globe.*

"This is a happy idea, most skilfully carried out. Fine printing, and a deep yellow paper, give a most charming effect to these vigorous and faithful illustrations of the edifices of the nineteenth century, and of some of the architectural works of the Middle Ages; and the work will thus worthily fill a gap in pictorial literature—for we have no popular book of consequence on modern architecture. Mediæval structures, moreover, have rarely been more effectively treated."—*Worcestershire Chronicle.*

TO GAS COMPANIES.

BOGHEAD CANNEL COAL.—This Coal is the most highly bituminous coal known, and therefore peculiarly adapted for mixing with inferior coals in the manufacture of Gas, for which purpose it is exclusively used. It yields 13½ cubic feet of gas, of the specific gravity of 375, per ton of coal; and a burner consuming at the rate of 1 cubic foot per hour, gives a light equal to 24 experiment candles, each consuming 120 grains of sperm per hour. The light yielded by 1 ton of this coal is equal to that from 1800 lbs. of sperm candles; whereas that from the same quantity of Newcastle Caking Coal is only equal to 1120 lbs.; and that from the best Wigan Cannel Coal to only 1344 lbs. of sperm candles. It can be shipped at any of the ports in the Firth of Forth or Clyde.—For terms and other particulars apply to R. W. KENNARD and Co., Sole Agents, 67, Upper Thames-street, London.
